

April 2016

To Whom it may concern:

I am a seasoned front end web developer who excels in UI design with 11 years of experience. I am passionate about making web experiences as easy for the consumer as possible, weather that be deriving as much info as possible so they have to input very little, or providing information in small chunks that are more easily understood.

While working for my last employer, I became an expert at their proprietary software while supporting many different business teams throughout the company. I have great working relationships with clients (weather they be internal or external) and have a long list of professional connections because of it. I designed the UI for web-based internal applications, designed, and developed a company intranet, and developed countless templates for business users to be able to build their own web pages for A/B and multivariate testing. I also became an expert in troubleshooting and am determined to get to the bottom of issues whether for internal users or the potential students who completed one of the forms I developed.

I am incredibly organized and maintain detailed notes on all I work on. I am also a self motivated person and don't rely on supervisors for detailed task lists. If I see that things need to be done I just take care of them. At Apollo Group I realized there was a lack of documentation on our proprietary systems and software and took it upon myself to fix this. I wrote 90% of the documentation on those tools that was published in our searchable wiki.

I also trained countless coworkers in my position and found that I really enjoy helping others to be self-sufficient. My love of teaching doesn't stop there as I also teach glassblowing at Pratt Fine Arts Center and archery at Next Step Archery in my spare time.

You can see my portfolio website at www.juliebergen.com. Please contact me at your earliest convenience so we may discuss your open position and how it might be a perfect fit for my skill set.

Sincerely,
Julie K. Bergen
